

SUBARNA GURUNG

JUNIOR FULLSTACK DEVELOPER

Dear Hiring Manager,

I am writing to apply for the Fullstack Developer Internship in your company. With a strong foundation in both front-end and back-end development, and a keen desire to deepen my knowledge and gain hands-on experience, I believe I would be a valuable addition to your team.

I am currently pursuing an education in TEC [EUX Datatekniker med speciale i programmering], where I have developed a solid understanding of web technologies, including HTML, CSS, and JavaScript, as well as back-end programming using NodeJS, ASP.NET. I also have experience working with modern front-end frameworks like Angular, React, NextJS and databases such as MSSQL, MongoDB & PostgreSQL. Through academic projects and personal initiatives, I have honed my ability to build full-stack applications, connecting responsive front-end designs with efficient and secure back-end architectures.

I am eager to apply my theoretical knowledge in a professional environment and learn from experienced developers in your company. My enthusiasm for web development, combined with my ability to learn quickly and adapt to new tools and technologies, makes me confident that I can contribute positively to your team. I am also familiar with agile methodologies, version control (Git), and have experience working in collaborative, team-based environments.

This internship represents a unique opportunity for me to gain real-world experience in fullstack development and contribute to meaningful projects. I am confident that my skills and passion for learning will make me a strong fit for this position.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team and learn from your experienced developers. I have attached my CV for your review.

Sincerely,
Subarna Gurung
